

Brighten up your town with colour this winter

We can inject an explosion of colour into your public parks and town centres throughout the dark days of winter and early spring.

A texturally interesting mixture of evergreen shrubs, herbs and hardy flowering plants offers a dazzling contrast to the gloom of grey skies and drizzle, giving way in spring to the surprise arrival of flowering bulbs.

Foliage plants can include conifers, euonymus and ivy. Herbs such as bay, sage and rosemary add scent as well as visual contrast. Flowering plants primrose and pansy bring joy for weeks and spring bulbs including snowdrops, daffodils, tulips, iris and hyacinth will ensure your town is never devoid of colour, however dreary the winter weather.
